8. when you click on home button, and you are already on home page it shows the message

Technology used

1. Html : basic tags like p, div, class, id, heading tags,form etc.
2. Css: css property like flex box properties,animations,positioning,font related property, background and text color related property ,padding and margins etc.
3. Javascript: event listner, create element, get element, for each loop to dynamically create the each card of blog etc.

Future enhancement

. At that time, the category, login, and signup buttons are not in a working stage. In the future, they will be fully functional, allowing users to:

- Category: Filter blogs based on specific categories to easily navigate and find content of interest.
- Login: Authenticate users by allowing them to log into their accounts securely, enabling features like personalized blog suggestions, commenting, and saving posts.
- Signup: Register new users, providing them access to additional features such as creating blogs, managing profiles, and interacting with the community.

. In future I will add some function that allow user to modify its blog after posting.
